## Accessible tables

Although we could simply embolden the column headers in the table below, this would be of no use to a learner accessing the web resource through screen reading technology.

Continent
Europe
Scandinavia
Africa

Use table headers to label column or row headings in your tables - these will be read out to users accessing the resource through via a screen reader.

To do this in Forge,

1. Highlight the column or row headings:

Country	Continent
France	Europe
Finland	Scandinavia
Tunisia	Africa

## 2. Open Table > Row > Row properties:

	⊞• 8 %	¶ ↔ ⊚ 🤊
ge Insert - Advanced - Equation bu	I Table	) ie 🖾 Notes
	Table properties Delete table	
ur tables. These can be read out to users a	Cell	ough screen reading
Continent	Row	Insert row before
Continent	Column	Insert row after
Europe		Delete row
Scandinavia		Row properties

3. In the Advanced tab, select header as the row type

B Row properties ×					
General Advar	nced				
Row type	Header -				
Alignment	Header				
Height	Body Footer				
	Ok Cancel				

- 4. Click OK.
- 5. One by one, highlight each cell in the header row and open Table > Cell > Cell properties:

. ₽ Ξ Ξ Ξ	<u>▶</u> <u></u> <i>I</i> ×	⊞• & ※	¶	↔ ⊛ 🤭
Insert • Advanced •	Equation bu	I Table	•	ne 🖽 Notes
		Table properties Delete table		
ables. These can be read o	out to users a	Cell	•	Cell properties
Cartingat		Row	•	Merge cells
Continent				<u> </u>

6. In the General tab, under cell type, select Header cell and click OK.

These actions add the appropriate tags to the html code behind the page which will be recognised by the web browser and screen reading technology.
